

TripSaver, with its audio, video and measurement streaming can be received only on PCs at this time, though the vendor, ANA, expects to add Android devices in the near future.

To be sure you can receive a broadcast [click here](#) to watch a 14-second TripSaver video.

If you see it and hear it, you're done! TripSaver will work well on your PC.

If not there are three possible reasons:

1. You need an updated version of Java - <https://java.com/en/download/>
2. You need an updated version of Adobe Flash - <https://get.adobe.com/flashplayer/>
3. You are blocked by your local Firewall. If so, contact [ANA](#) for simple instructions to IT.
